A gain or loss arising from a change in the fair value of an AFS security shall be recognized directly in other accountabilities under the account "Net Unrealized Gains/(Losses) on AFS Financial Assets", except for impairment losses and foreign exchange gains and losses, until the financial asset is derecognized, at which time the cumulative gain or loss previously recognized in accountabilities shall be recognized in profit or loss. When a decline in the fair value of an AFS financial asset has been recognized directly in other accountabilities and there is objective evidence that the asset is impaired, the cumulative loss that had been recognized directly in other accountabilities shall be removed from other accountabilities and recognized in profit or loss even though the financial asset has not been derecognized.

The amount of the cumulative loss that is removed from other accountabilities and recognized in profit or loss shall be the difference between the acquisition cost (net of any principal repayment and amortization) and current fair value, less any impairment loss on that financial asset previously recognized in profit or loss.

Impairment losses recognized in profit or loss for an investment in an equity instrument classified as AFS shall not be reversed through profit or loss.

If, in a subsequent period, the fair value of a debt instrument classified as AFS increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in profit or loss, the impairment loss shall be reversed, with the amount of the reversal recognized in profit or loss.

6. **Held-to-Maturity (HTM) Financial Assets** – This refers to debt securities, quoted in an active market with fixed or determinable payments and fixed maturity, that a client has the positive intention and ability to hold to maturity other than: (a) those that upon initial recognition are designated as at fair value through profit or loss; (b) those that are designated as available for sale; and (c) those that meet the definition of loans and receivables.

A trust institution shall not classify any debt security as HTM if the client has, during the current financial year or during the two preceding financial years, sold or reclassified more than an insignificant amount of HTM investments before maturity (more than insignificant in relation to the total amount of HTM investments) other than sales or reclassifications that:

- (a) are so close to maturity or the security's call date (i.e., less than three months before maturity) that changes in the market rate of interest would not have a significant effect on the security's fair value;
- (b) occur after the client has substantially collected all (i.e., at least 85 percent) of the security's original principal through scheduled payments or prepayments; or
- (c) are attributable to an isolated event that is beyond the client's control, is non-recurring and could not have been reasonably anticipated by the client.

For this purpose, the phrase "more than an insignificant amount" refers to sales or reclassification of one percent (1%) or more of the outstanding balance of the HTM portfolio: Provided, however, That sales or reclassification of less than one percent (1%) shall be evaluated on case to case basis.

The aforementioned tainting provision on HTM securities shall be applied on a per client basis.

HTM securities shall be measured upon initial recognition at their fair value plus transaction costs that are directly attributable to the acquisition of the securities.

After initial recognition, a trust institution shall measure HTM securities at their amortized cost using the effective interest method.

A gain or loss arising from the change in the fair value of the HTM security shall be recognized in profit or loss when the security is derecognized or impaired, and through the amortization process.

Unamortized Discount/Premium - This refers to the unamortized discount/premium on HTM debt securities, which shall be debited/credited monthly based on the effective interest method with the corresponding credit/debit to an interest income account.

Allowance for Credit Losses - This refers to the cumulative amount of impairment loss that has been incurred on HTM securities. A trust institution shall assess at each time it prepares the client's financial statements whether there is any objective evidence that an HTM security is impaired.

If there is an objective evidence that an impairment loss on HTM securities has been incurred, the amount of loss is measured as the difference between the security's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the security's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The amount of impairment loss for the period shall be recognized in profit or loss.

7. **Unquoted Debt Securities Classified as Loans (UDSCL)** - This refers to unquoted debt securities, with fixed or determinable payments. A gain or loss arising from the change in the fair value of UDSCL shall be recognized in profit or loss when the security is derecognized or impaired, and through the amortization process.

Unamortized Discount/Premium - This refers to the unamortized discount/premium on UDSCL, which shall be debited/credited monthly based on the effective interest method with the corresponding credit/debit to an interest income account.

Allowance for Credit Losses - This refers to the amount of impairment loss that has been incurred on UDSCL. A trust institution shall assess at each time it prepares the client's financial statements whether there is any objective evidence that a UDSCL security is impaired.

If there is an objective evidence that an impairment loss on UDSCL has been incurred, the amount of loss is measured as the difference between the security's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the security's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The amount of impairment loss shall be recognized in profit or loss under the account "Provision for Credit Losses".

8. **Investments in Non-Marketable Equity Securities (INMES)** – This refers to equity instruments that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

INMES shall be measured upon initial recognition at its fair value plus transaction costs that are directly attributable to the acquisition of the security. After initial recognition, a trust institution shall measure INMES at cost. A gain or loss arising from the change in fair value of the INMES shall be recognized in profit or loss when the security is derecognized or impaired.

Allowance for Credit Losses - This refers to the cumulative amount of impairment loss that has been incurred on INMES. A trust institution shall assess at each time it prepares the client's financial statements whether there is any objective evidence that an INMES is impaired.

If there is an objective evidence that an impairment loss on INMES has been incurred, the amount of impairment loss is measured as the difference between the carrying amount of the security and the estimated future cash flows discounted at the current market rate of return for a similar financial instrument. Such impairment loss shall not be reversed.

9. **Loans and Receivables** – This refers to non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than those that the client intends to sell immediately or in the near term or those that upon initial recognition are designated as at fair value through profit or loss.

Discount shall be accreted over the life of the SCR by crediting interest income using the effective interest method.
