		REVISION NO.	3
		EFFECTIVITY	June 24, 2024

We confirm and undertake to do the following:

1. A manual meter reading shall be conducted by the Licensee together with the PMT before RPSM shutdown.
2. A stress test shall be conducted on the RPSMs in order to ensure that actual machine settings will reflect the approved parameter settings and RPSM transactions are captured by the system. The stress test shall be conducted based on a test script which shall be prepared by the Licensee. The results of the stress test should be favorable prior to commercial operation of the RPSMs.
3. In the event that the RPSM shutdown is an emergency in nature, machine meter values prior to shutdown shall be derived from the system. Once power has been restored, manual meter reading shall be conducted. Thereafter, a stress test shall also be conducted to ensure that the RPSM's current machine configurations and RPSM transactions are captured by the system. Said stress test shall be based on a test script which shall be prepared by the Licensee. Test results should be favorable prior to commercial operation of the EGMs.
4. The abovementioned undertaking shall be carried out in close coordination with the Compliance Monitoring and Enforcement Department.
